

# Release Notes «12 June 2023»

With the release on the 12<sup>th</sup> of June 2023, enhancements and improvements were implemented in the following areas.

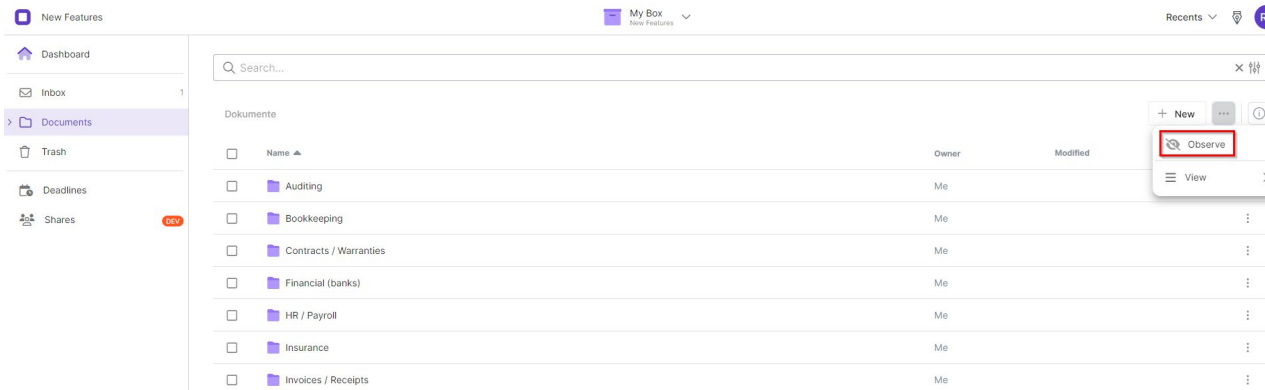

Bereich

Details

## DeepBox Frontend

### Observe feature

It is now possible to activate the "Observe" feature on an Advanced or Simple Box. The function can be activated in the Inbox as well as in the document finder on each folder level. As soon as a new document is added, the observer receives an e-mail notification.

deepbox

Hello **Bereich** **Friedrich**

A new document has been added to the **My Box box** :

Location: Inbox

File name: invoice.pdf

[View](#)

Do you want to disable monitoring of this location?

DeepBox Frontend

**Preview of office files**

Office files (Word, PowerPoint, Excel) are now always displayed with a preview when the detail view of these files is opened.

DeepSign

**The same user can now sign multiple times**

You now have the possibility to visually place the same signature several times within a document. This allows the same person to place their signature on different pages within the same document. You can find more information about this function on our [support page](#).

DeepSign

**UX improvements in document import**

When uploading a new document to DeepSign, it is no longer necessary to click on the text "Upload". Instead, a click inside the dashed rectangle is sufficient. Alternatively, you can now simply drag and drop the document anywhere on the page.
