

New visual signature with configuration options

The visual signature has been optimized and can now be reconfigured. On one hand, each logged-in signer can now define an optional text and location in addition to their visual signature. On the other hand, an organization, starting from the "Small" subscription, can make additional settings for the entire organization. These settings have the potential to override individual user settings. The organization's configuration can be managed by the owner.

My signature

The display may differ when signing due to the configuration of your organisation. When signing a document, you will see a preview of the signature used.

Signature appearance

Determine the appearance of the visual signature within your organisation. Members of the organisation can further personalise the signature within these guidelines.

- Level of Security
Setting applies to all signatories
- Additional text
Only displayed if defined by the signatory
- Location
Only displayed if defined by the signatory
- DeepSign Logo
Setting applies to all signatories

Various improvements and bug fixes

- Improved UX and standardization of various dialogs
- Fixed an issue affecting the addition of observers after adjusting the browser window size
- Resolved a signing process issue: continuation in DeepSign is now possible even if a document was completely deleted in DeepBox
- Enhanced navigation from document details back to DeepBox or back to the DeepSign cockpit
- Improved user-friendliness of drag & drop uploads in the DeepSign cockpit
- Optimized behavior when opening an invitation link while logged in with the wrong account
- Display improvements for organizations with longer names

Various bug fixes and improvements, such as:

- Fixed an issue where the option to convert multiple files to PDFs simultaneously was mistakenly displayed
- Renaming from "DeepBox" to "Organizations": As an organization (formerly "DeepBox") can be used for various products within the DeepCloud ecosystem (e.g., DeepBox, DeepSign, DeepO, or DeepFlow), we have replaced the term "DeepBox" with "Organization."
- Optimization of the onboarding flow when a user with Single Sign-On (SSO) login establishes a connection to the DeepCloud account within the context of a DeepSign signature invitation.

Payment by invoice is now possible

- Invoice payment is now available starting from the Compact subscription. Activation can be requested by contacting support@deepbox.swiss

Various improvements

- In the DeepO settings, uploaded Approver structures and Approval responsible parties are visible
- The "Ledger account" field is available in the suggestions

The screenshot shows the DeepO settings interface. On the left is a sidebar with a menu. The 'Approver structures' item at the bottom of the sidebar is highlighted with a red box. The main area displays a 'Suggestions - New definition' dialog box. At the top of the dialog, it shows 'Validity range: All addresses - All boxes' and 'Document type: Rechnung'. Below this are tabs for 'Case', 'Header', 'Positions', and 'Other', with 'Header' selected. Under 'Field values:', there are three input fields. The first is a dropdown menu with 'Ledger account (Payment details)' selected, highlighted by a red box. The second is a dropdown menu with 'Method' selected. The third is an empty text input field. To the right of these fields are '+' and '-' buttons. At the bottom of the dialog, there is a 'Name' field containing 'All addresses', a checked 'Description' checkbox, and a 'Generate automatically' toggle switch which is turned on. At the very bottom of the dialog are 'Cancel' and 'Add' buttons.
