

# Recognition statistics by date

The detection statistics can now be restricted on the basis of dates.

The screenshot shows the 'deepO - Settings' interface. On the left is a navigation sidebar with categories: Organization (all boxes), Box, and User settings. The 'Recognition statistics' option is selected and highlighted in blue. The main content area is titled 'Recognition statistics' and contains the following text: 'You can download the statistical data for document recognition here. The download may take longer depending on the amount of data.' Below this text is a 'Date range (optional)' section, which is highlighted with a red border. It features two date input fields, each with a calendar icon and the text 'Ex: 29.01.2024', separated by a hyphen. Below the date range is a blue 'Download' button with a download icon.

## New "File comment" field for expressions in the flow

The "File comment" field can now be used in the Expression Editor for flows. This field can be used to transfer values from the file comment for a permanent note.

## New function 'LookUpValue' for expressions

Example of the function in combination with the visa table:

The 'LookUpValue()' function can be used to look up a visa officer in the visa table in order to obtain the visa number as a return value:

Example with Abacus data - sample client 7777

LookUpValue ("Approvers", "Description", "**Paul Mahrer**", "value" ) -> Output value: 1

LookUpValue ("Approvers", "Description", "**pm**", "value" ) -> output value: 1

LookUpValue ("Approvers", "value", "**Document.ApproverId**" , "value" ) -> output value: 1

# New function 'LookUpValue' for expressions

The image shows two overlapping screenshots from the DeepO application. The top-left screenshot displays the 'Expression Editor' interface. A search filter is set to '1'. The expression field contains the code: `LookUpValue ("Approvers", "value", "Document.ApproverId", "value")`. A sidebar on the left lists function categories: General functions, Operators, Flow Konstanten, Flow Funktionen, and Dokument. Below the editor, the expression is shown as `LookUpValue ("Approvers", "value", "D` with a note: 'The expression is applied to the detected value.'

The bottom-right screenshot shows a document preview titled 'Rechnung Nr. R-120' with a date of 'Wittenbach, 11.05.2021'. The document includes fields for 'Lieferanten-Nr. 7', 'Unser Zeichen Administrator', and 'Bestelldatum 11.05.2021'. A table lists items with columns for 'Pos', 'Beschreibung', 'Menge', 'Einheit', and 'Preis'. Item 10 is 'Visum' with a price of 9.29. A modal window titled 'Other languages' is open, showing a search for 'Visum' with a plus icon next to it. The modal also lists 'French', 'Italian', and 'English' with 'Keywords' input fields. The document footer shows 'Total Fakturabtrag inkl. MWST'.

## Various bug fixes and improvements, such as

- Process optimisations for invitations for users or shares
- Problem solved where functions from the context menu were missing

## Various bug fixes and improvements, such as

- optimised sidebar handling
- improved loading behaviour in the cockpit
- improved translations
