

New position field "HK/NK date" (ancillary expenses)

If the property data has been uploaded from Abacus to the DeepBox, the field "HK/NK date" is now available for the document types "Invoice" and "Invoice (received)".

VAT		POSITIONS							
	Position	Text	Date	HK/NK Datum	From	To	Reference Object	Account	Project
	10			24.05.2021					

 Invoice and position totals do match

Various bug fixes and improvements, such as

- No positions are now charged during processing with the "VAT" tab active
- Comparison of header amount and position total now also occurs during automatic processing

DeepCloud invoice as PDF attachment & automated processing

This function has been further improved and will be used for the first time for invoicing at the beginning of March.

Details on the function can be found in the [release notes](#) from mid-February.

Various bug fixes and improvements, such as

- Improved display of vouchers in the invoice overview
- Fixed an issue where the email notification for new invoices was not sent under certain conditions

Billing of DeepFlow

As the Beta phase for DeepFlow ends, used Flows will be billed starting from the 1st of March 2024. Further information on billing can be found on [the support page](#).

Various bug fixes and improvements, such as

- Tag optimisations
- Improvements within the context menu
- Dashboard improvements on mobile devices
- Optimised behaviour when selecting multiple documents

Various bug fixes and improvements, such as

- Improvements and optimisations for the visual signature
- Optimised handling of special cases with a very high number of placed signatures
- Fixed a problem where an incorrect action was displayed after a rejection in some special cases
- Fixed a problem where a user incorrectly received an email notification regarding a rejection/withdrawal for a document, due to the signature order
- Improved stability of the DeepSign application
- Various small UI improvements
