

## Add new intermediate position

Additional items can be added between individual positions in the "Positions" tab. Previously, each newly entered position was added at the end.

## New fields for document type credit note

The "Tax date" field has been removed from the credit notes document type. The fields "Period" and "Delivery date" have been added.

# Improved display of settings suggestions and validations

In the DeepO settings under "Definitions per address", suggestions and validations already entered per document type are more easily accessible.

The screenshot displays the settings for 'Bosshard AG, 3003 Bern'. The left sidebar shows the navigation menu with 'Definitions per address' selected. The main content area has tabs for 'Address', 'Keywords', 'Suggestions', 'Validations', 'Last used value', and 'Settings'. The 'Suggestions' tab is active, showing a 'Document type' dropdown menu with 'Invoice (Received)' selected and a 'New entry' button. Below this, an 'Already recorded:' section is highlighted with a red box, showing 'Invoice (Received)' with a count of 2. At the bottom, a list of suggestions is shown, including 'Bosshard AG - Visum setzen' and 'Bosshard AG - Kontierung', each with an edit icon and a vertical ellipsis menu icon.

## Cancelled YAPEAL invoices can be paid by credit card

Previously, cancelled YAPEAL invoices could only be paid again using the same payment method. It is now also possible to use a credit card for payment.

## DeepO now also available as a fixed price model

The new fixed price model offers the option of deciding individually for each Advanced Box whether the position recognition, extended fields and flows (incl. mailroom) functions should be charged at a flat rate of CHF 0.50 per document. The fee of CHF 9.00 per month is not charged for Advanced Boxes that are billed at a fixed price.

## Various bug fixes and improvements

With this release, numerous improvements have been implemented to improve the stability and security of the system.
