Various bug fixes and improvements, such as

- Fixed a bug where in rare cases not all functions were displayed in the context menu
- Improvement of the application's stability

Simplified onboarding process from Abacus

The DeepCloud onboarding process has been simplified for Abacus customers. When a DeepCloud organisation is created via Abacus (Q908), a credit card is no longer required.

Further details will be communicated to Abacus customers.

Performance optimization when signing

Performance has been improved, especially when signing large documents or processing multiple documents simultaneously. This has increased the efficiency and speed of the processes.
