

## Various improvements to the SSO function

- User information that was changed via the IDP is now also updated in DeepAdmin
- Multiple domains can now be used via the same IDP tenant

## Various bug fixes and improvements in DeepAdmin

- Improved handling of DeepID verification status
- Optimized internal linking
- Fixed issue when verifying a Personal Space
- Corrected a bug where the dropdown menu occasionally did not work
- UX-/UI Improvements

## Generic folders can be renamed

- With the member permission "Organize," generic folders can now also be renamed. With the "Edit" permission, all non-generic folders can still be renamed.

## Various bug fixes and improvements, such as:

- Fixed an upload issue that caused duplicate files in certain Firefox versions
- Unified appearance of fonts and icons
- Improved size of document preview thumbnails
- Added missing redirect link from DeepBox to DeepSign
- Enhanced handling of special characters in file names

## Email notification upon payment method expiration

Email notifications are now sent upon payment method expiration, ensuring users with the "Owner" role are informed in a timely manner. The first reminder is sent 30 days before expiration, and the second reminder 7 days prior. These reminders are only sent for MasterCard and VISA (Postcard does not have an expiration date)

## DeepSign onboarding is now also available for private individuals

In the DeepSign registration process, there is now the option to choose between an account for businesses, associations, authorities, or personal use.

Step 1/3

### Who is the account set up for?

**Business**

Account for a company, association or authority.

**Private individual**

Account for personal use.

Continue

## Invoice amounts can now be rounded to 0.05 or 0.1

All invoice amounts are now automatically rounded up or down. This simplifies payment processes and ensures clear, consistent pricing.

## Various bug fixes and improvements, such as:

- Cancellation option removed during the QES process (must be cancelled via DeepID/Mobile ID)
- Optimized seal certificate admin
- Updated [list](#) of accepted residencies with DeepSign
- Timeout issue resolved
- Adjusted account upgrade dialog
- Fixed incorrect scrolling behavior
- Translation issues resolved
- Signature panel was not displayed correctly on mobile devices
- Signature placeholder was mistakenly shown on the document
- Different sizes of signature fields in edit and preview modes
- Improved error handling
- Optimized upload of visual signatures
- Various improvements in batch signing
- Cleaned up old code to improve application stability
- Improved handling of very long email addresses

## Optimizations in the dashboard

- Filter options
- Selection of all options
- Harmonization of icons
- Optimization of the display area
- Toolbar was not displayed correctly in all cases
