

## Various improvements

- Improved recognition of licence plates in invoices from road traffic authorities
- Optimisations in the upload & synchronisation of Abacus master data

# Email address can now be changed via DeepAdmin

- Possible as long as e-mail is not managed via claimed domain or SSO

## Various bug fixes and improvements in DeepAdmin

- Improvements to Invoicing
- Split Street and number in addresses
- Improvements to Certificate and Seal Management
- Fixed bug, where tags could not be managed for private organisations in some cases
- Translation updates
- Better handling when organisation names are very long in sidebar
- Improvements to «My Identity» Page

## Various bug fixes and improvements, such as

- Fixed issue, where after deleting a large amount of documents not all remaining files were displayed initially (manual refresh was needed) in certain circumstances
- Fixed issues with banner, when organisation had open invoices
- Smaller UI / UX improvements
- Fixed issue, where endless loading in tag menu did not work anymore
- Translation updates

# New Approver Feature

Define people that need to approve a signing process, but do not need to sign themselves.  
Available from Subscription Small or larger

The screenshot shows the configuration page for a signing process. At the top, there is a header with the 'deep:sign' logo, 'SWISS MADE' with a Swiss flag, and a 'CH' country code button. Below this, the 'LEVEL OF SECURITY' section has three buttons: 'Simple' (selected), 'Advanced', and 'Qualified'. The 'WHO NEEDS TO SIGN' section has a toggle for 'I am signing' which is turned on. Below this is an 'E-mail Signatory' input field containing 'crystal.deepcloud@gmail.com'. There are two buttons below the input: 'Add signatory' and 'Add approver', with the latter highlighted by a red box. Further down, there are three toggle switches for 'Define order of signing', 'Place signatures on document', and 'Allow attachments for signee', all of which are currently turned off. The 'OBSERVERS' section has an 'Edit observers' link. The 'ATTACHMENTS' section shows 'Supported format: PDF (up to 40MB)' and an 'Attach files' button. At the bottom, there is a 'MESSAGE TO ALL PARTICIPANTS' text area with the placeholder 'Add message' and a 'Continue' button.

## Various bug fixes and improvements, such as

- Improved language handling
- Improvements to Cockpit, like updated Toolbar when selecting documents or Mobile view ports
- Improvements to image cropping and transparency when uploading a signature: You can now rotate the image and zooming was improved
- Fixed issue, where forwarding a signature to more than one signee might lead to an error
- Changed default tab to «To Sign» instead of «All» in order to focus on open tasks
