Various improvements, such as

- There is now a "Delivery address" field for the "Order" document type. A delivery address number can be defined using a manual entry or a suggestion
- New search function in the suggestions, validations and keywords
- New download button for directly downloading documents in the DeepBox Editor

Various bug fixes and improvements, such as

- Improvements to the check-out process
- A Share Invite to a Box can now be sent to several people at the same time
- UI optimisations in seal management
- Improvements when changing the language in the application
- Optimisations on the "My identity" page
- Fixed a bug where a user with over 50 folders could not select the correct folder for sharing
- Bug fixed, were inviting users for personal organisations did fail in some instances

Notification of the billing administrator

If a Billing Contact is defined in DeepAdmin, only this person receives email notifications about invoices and their successful payment. Previously, these notifications were also sent to all Owners of the organisation despite the Billing Contact being defined.

Various bug fixes and improvements, such as

- Improved behaviour for expert settings
- Optimisations to the seal process
- Fixed a bug that caused several comments to be displayed at the same time, although only one was supposed to appear
- Various other minor bug fixes
- Minor optimisations to the approver process
- Improvements to the search input in the Cockpit
- Minor optimisations to error handling on mobile screens
