Various improvements and bug fixes, such as

- Fixed Bug: In some cases white page was shown, if account was changed in same session
- Improved the adding of e-mails to various dialogues
- Various small UX and UI improvements to recently updated DeepAdmin pages
- Various small Bug Fixes on recently updated DeepAdmin pages

Various improvements and bug fixes, such as

- Improved behavior when sorting after adding a new folder
- Optimizations to the Box Switcher and the Header
- Fixed an issue where previewing very large files was not working correctly
- Integration of AI translations in multilingual fields (e.g. when creating a new folder)

Implemented an account blocking for unpaid bills and missing payment methods

Users in DeepSign will now be locked out if:

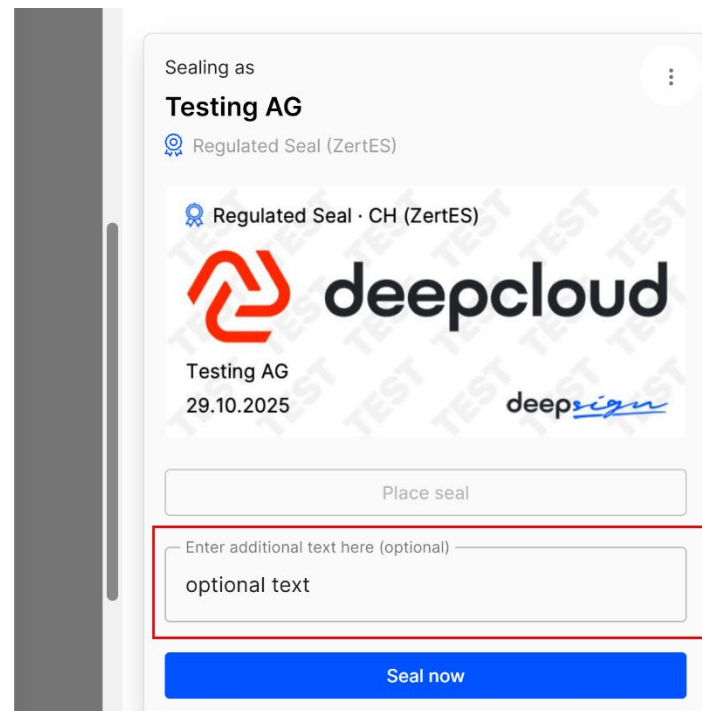

- 3 or more bills are open
- No valid payment method has been registered
- Exception: The 5 free EES (Easy Electronic Signatures) can still be used

Users in DeepBox will now also be locked out if:

- 3 or more bills are open
- Previously, users were only locked out if there were too many users in the organization

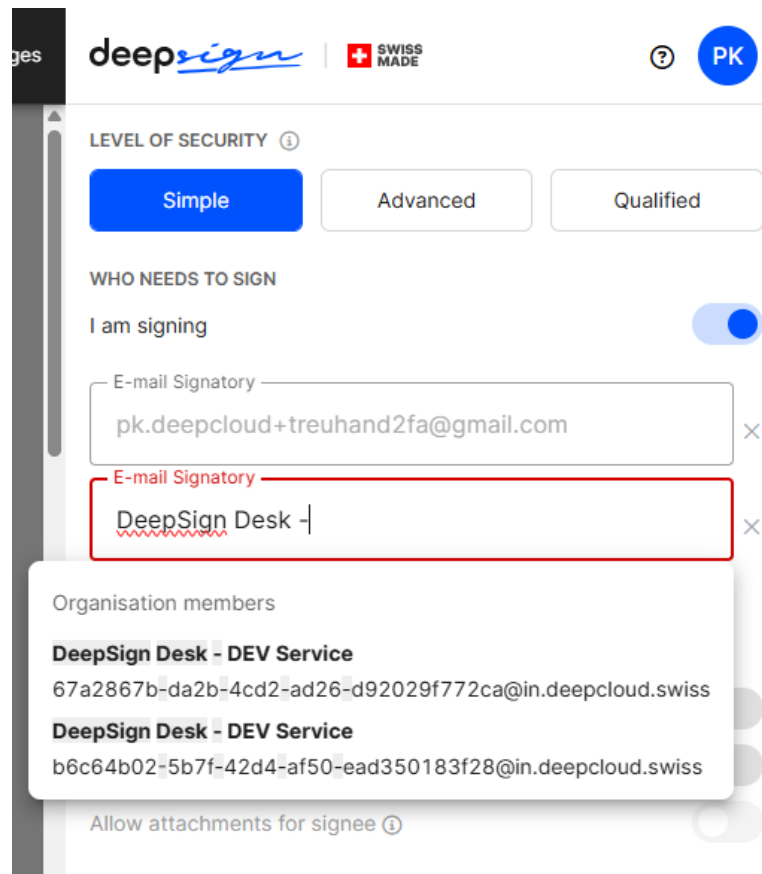

Note/Additional Text in the Seal Case

Now, in addition to the visual seal, an additional text can be placed. This text field can be positioned independently of the seal on the document and provides space for notes or additional information directly on the sealed document.

Improvements to participant suggestions

Members of an organization can now be searched by name, not just by email address. Name suggestions appear in various dropdown fields, such as when adding signers, approvers, or observers.
