

Document title recognition

A new expression function, `Document.DocumentTitle`, is now available, allowing the recognised document title to be used directly. It can be used in the expression editors for suggestions, keywords, flows and validations.

Free account assignment references

Free account assignment references can now be configured for every Advanced Box. Your own reference tables can be stored via Excel upload and applied automatically to invoices. Further information on setup can be found in the support article [“Free account assignment references”](#).

Dossier filing via Abacus barcode

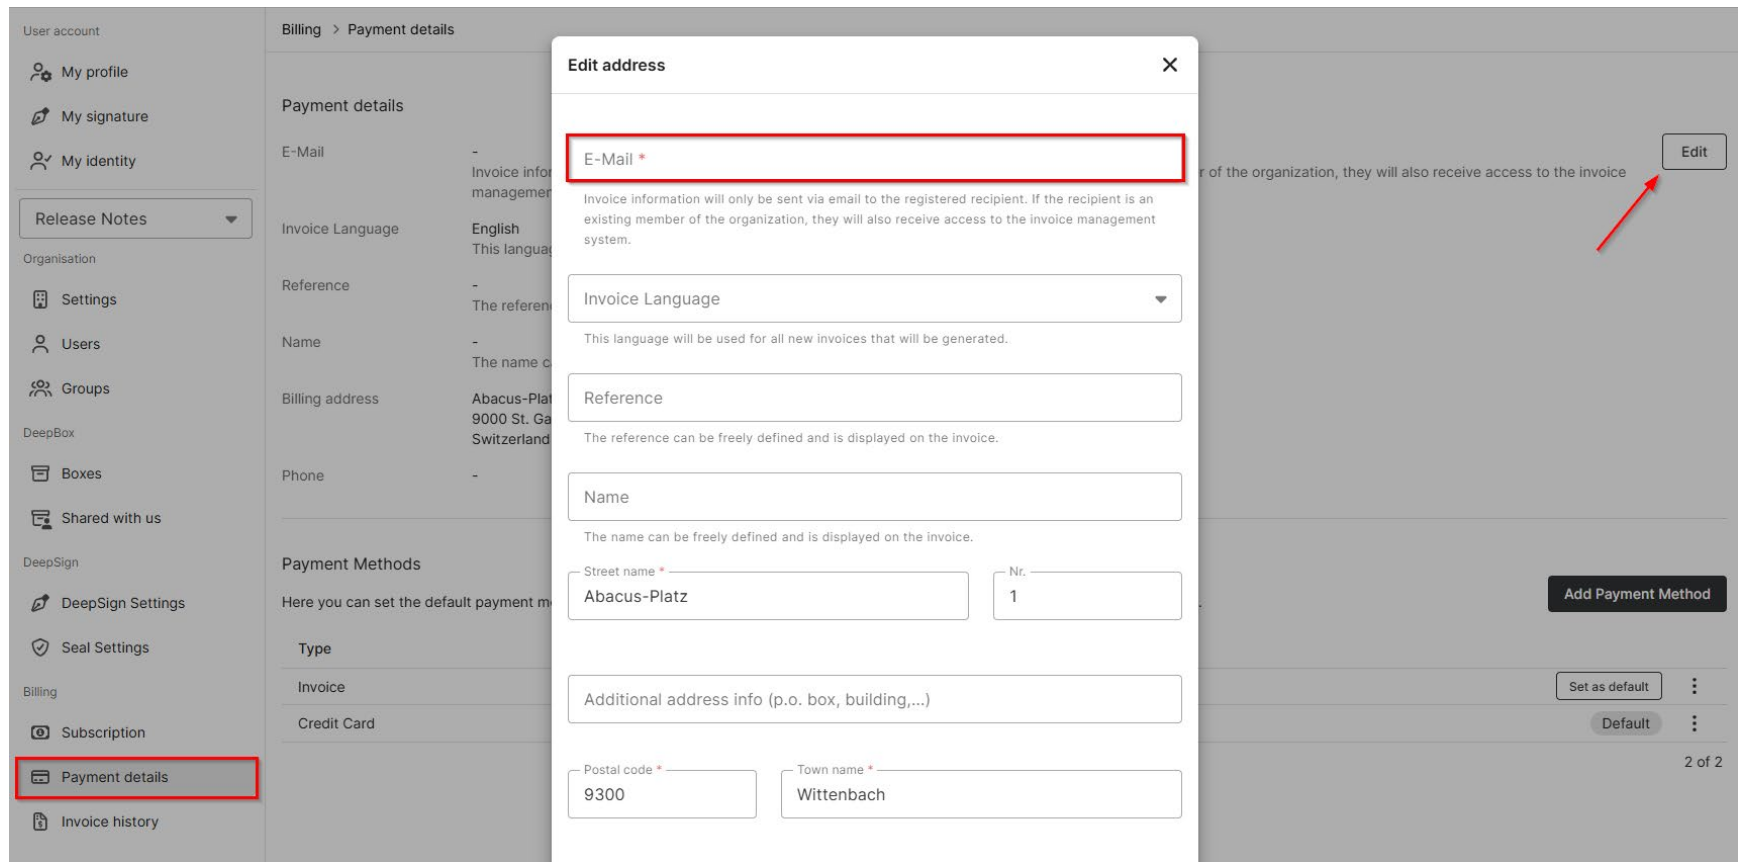

Documents with an Abacus dossier barcode can now be filed automatically in the correct Abacus dossier. DeepO recognises the barcode, extracts the filing information it contains and files the document in the corresponding dossier after processing. Further information on setup and requirements can be found in the support article [“Dossier filing via Abacus barcode in DeepO”](#).

Various bug fixes and improvements, such as

- Fixed an issue where removing the phone number in the organisation settings could lead to an error
- Minor improvements to signature definition in “My Signature”
- Improved error handling when entering too many characters in some input fields
- Fixed an issue where service users were counted when checking the maximum number of users allowed in an organisation
- Improved error message when the user limit is exceeded while adding users to the organisation
- Improved error handling when creating a service user
- Fixed an issue that prevented sorting in the user list
- Fixed edge-case issues with invitations
- In Box Shares, the sender of the share is now also displayed
- Fixed an issue where the group was not applied if it had already been defined in the member invitation
- Major update to the FE library
- Various minor UI updates and optimisations

Admin/Member as billing contact with access to billing management

Previously, only users with the Owner role could access the “Payment Details” and “Invoice History” tabs. These tabs are now also accessible to users with the Admin or Member role, provided they have been stored as the billing contact.

Various bug fixes and improvements, such as

- Major update to the FE library
- Various minor UI updates and optimisations

Various bug fixes and improvements, such as

- Various minor bug fixes for edge cases
- Improvements to the handling of attachments and observers in draft mode
- Improved behaviour when selecting all documents in the Sign tab for batch signing
- Major update to the FE library

Relaunch of the Web UI

- Integration of the DeepCloud account
- Extended results of the signing authority check: the network of individual persons can now be viewed in DeepInfos
